

TASK for extra 1 point for the exam

This is only for the first five quick and correct answers. Deadline: 22nd February 2026. Task: Choose only one of the following case studies, draw a problem situation using a rich picture and define the concept of catwoe, including root definitions, define a conceptual model through a list of activities, how the system should ideally work.

Send me a word file by e-mail to

horakovat@pef.czu.cz .

Choose from following studies:

Case study 1 Implementing LMS / AI assistant at a university (soft problem)

Situation

- Leadership wants fast rollout; IT cares about security/integration; teachers fear admin burden and loss of autonomy; students want simplicity and fairness; admin office handles processes and queries.

Case study 2 E-shop returns/complaints process (harder core, soft edge)

Situation

- High costs and unhappy customers; logistics overloaded; customer support overloaded; finance handles refunds; warehouse restocking; legal deadlines.
