
1

Disadvantage of batch processing model is

Question 1 Select one:

☐

a.

effectivity in usage of computational power

☐

b.

ability to establish secure enviroment for computer

☐

c.

off-line processing

☐

d.

well trained personel operating computer

2

Fill the missing correctly:

When configuring network interface on node we must assign an Answer 1 Question 2 .

Also Answer 2 Question 2 is needed to determine size of local network.

If communication outside of network is required we need to include Answer 3 Question 2 .

In case we want to use text names instead of numeric addresses also Answer 4 Question 2 service is needed.

3

In terminal model (host/terminal), network is transporting

Question 3 Select one:

☐

a.

requests and respondes

☐

b.

questions and answers

☐

c.

queries and tables

d.

raw inputs and outputs

4

Some frequency bands may be used for data transmission without license. It usually means that these frequencies are ...

Question 4 Select one:

a.

slow

b.

above 4 GHz

c.

protected

d.

fast

e.

shared

5

Describe shortly the function of virtual memory in a computer. What is the principle of use of virtual memory?

Which software is responsible to maintain the virtual memory?

Give example.

Answer text Question 5

6

In wireless networks we tend to use higher frequencies mainly because of

Question 6 Select one:

☐

a.

we can cover larger areas with one AP

☐

b.

cheaper devices for higher frequencies

☐

c.

most of the frequencies above 1 GHz are free to use

☐

d.

more bandwidth which is available there

7

What is true for Linux?

Question 7 Select one:

☐

a.

Multi user, multi monitor

☐

b.

Multi task, multi user

c.

Multi user, multi application

d.

Multi processor,multi user

8

Server is

Question 8 Select one:

a.

low performance computer connected to desktop

b.

specialised computer providing services in network

c.

storage add-on for mainframe

d.

layer 2 network addressing device

9

Mobile OSs are designed differently from desktop ones -

Question 9 Select one or more:

a.

they expect battery-operated devices

b.

touchscreen is the primary interface

c.

display orientation can be changed by the user

☐

d.

less security is needed, while user has full physical control over the device all the time

☐

e.

internet connection is a rarely used function

10

In a short essay, discuss text user interface (shell) - where it is used nowadays and its advantages and disadvantages.

Answer text Question 10

11

Select correct terms:

Operating system serves for multiple purposes in computer system. OS controls and assigns Answer 1 Question 11 . Also creates either graphical or text Answer 2 Question 11 and for user programmes it provides Answer 3 Question 11
